The U.S. lift Truck division located in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Initially the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. started in 1960, to import fully assembled lift trucks as part of a domestic equipment expansion venture. Product sales of these products were primarily targeted to state-run corporations, large scale organizations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division begun trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Daewoo began the first domestic lift truck business in 1967, and rapidly acquired a whopping 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a situation of considerable expansion of their forklift operations.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint enterprise project to counter act competitive pressures in the US materials handling market. This venture radically expanded Daewoo's lift truck sales. Construction was completed in 1984 to facilitate a contemporary plant which helped establish the business for the fabrication of high added-value products suitable for export. In 1993, the corporation had a global sales system and started exporting models they had established through in-house technology, as an sovereign brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
