

JLG Forklift Part

JLG Forklift Part - After retiring in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending numerous years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

Whilst on their trip, John spent time talking to former business associates whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a substantial market for a product that could promptly and safely lift people in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they designed and sold the first JLG aerial work platform. The business incorporates many of the simple design essentials of that original lift into current designs.

JLG lift trucks have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. At present, the business proudly continues to expand itself into various marketplaces worldwide and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
